

I am writing to support XM radio. I have had XM in my car for about a year now and love using it for long trips. I believe there should be no reason that they are unable to broadcast anything historical radio stations have been able to broadcast. I feel that by not allowing XM to broadcast things such as weather and traffic, you will be discriminating against XM radio and their listeners. In a country that believes in equal rights for all, this is just wrong. Please allow XM radio to broadcast traffic and weather.
